Letter of Recommendation

Letter of Recommendation: Sample 2

I have known Mr. _____ for the past one year dealing his best in the task roles of a teacher in three subjects as well as Head of Chemical Engineering department. Mr. _____ is a pleasant, hardworking and very cooperative youngman. He adjusts with all his peers very well and stands well on his ethical values.

I find roots of passion for analysis and initiative strengthened within him. He is of experimental nature, loves to learn new things and withstands failures very strongly. He has completed the course work for his MSc degree and has earned a cumulative GPA of 3.83 out of 4.00. He is at the verge of commencing his new research Project. I am highly impressed by his quest to enhance professional knowledge. It gives me immense pleasure to recommend him to your esteemed University for pursuing his Postgraduate/Doctoral studies.

Dr _____
