a. Peak incidence is in 15 to 30 years age group

b. People with low intelligence are more predisposed

c. Insight into the illness is lost

d. Behaviour therapy is very helpful

9. Which one of the following feature is not correct about Felty's syndrome?

a. Splenomegaly

b. Rheumatoid arthritis

c. Lymphadenopathy

d. Anaemia

10. Which one of the following signs are not indicative of meningeal irritation?

a. Kernig's sign

b. Brudzinski's sign

c. Neck rigidity

d. Hoover's sign

11. With reference to ozone, as a disinfecting agent of drinking water, consider the following characteristics:

a. Powerful oxidizing property

b. strong viricidal effect

c. Strong residual germicidal effect

d. Ability to remove undesirable odour and taste

Which of these are the characteristics of ozone?

a. 1, 2 and 3

b. 1, 3 and 4

c. 1, 2 and 4

d. 2, 3 and 4

12. Among the following vaccines, which one is the most heat labile?

a. OPV

b. Measles

c. DPT

d. BCG

13. When the vasectomised person's wife gives birth to a healthy child after vasectomy, which one of the following periods after such vasectomy is considered for declaring it as 'vasectomy failure'

a. Less than 3 months

b. 3 months to 9 months

c. 9 months to 12 months

d. More than 12 months

14. Consider the following diseases:

a. Acute glomerulonephritis

b. rheumatoid arthritis

c. Rheumatic fever

d. Typhus fever

Which of these diseases could be the result of Streptococcal Group-A infection?

a. 1, 2, 3 and 4

b. 1, 2 and 4

c. 2, 3 and 4

d. 1 and 3

15. In the coverage evaluation of immunization programme, the sampling method used is

a. Cluser sampling

b. Random sampling

c. Stratified sampling

d. Systematic sampling
