

Competitive Exams: Psychology MCQs (Practice_Test 23 of 68)

Doorsteptutor material for NEET is prepared by world's top subject experts: Get **full length tests using official NTA interface**: all topics with exact weightage, real exam experience, detailed analytics, comparison and rankings, & questions with full solutions.

1. • **Assertion (A)**: Limbic system is a group of structures in the cardiovascular region.
 - **Reason (R)**: Limbic system is involved in the expression of motivation and emotion.
 - a. Both A and R are true and R is the correct explanation of A
 - b. Both A and R are true but R is NOT the correct explanation of A
 - c. A is true but R is false
 - d. A is false but R is true

2. Match List-I with List-II and select the correct answer:

List-I (Key phrases)

List-II (Theorists)

- a. Habit strength
- b. Trial and error
- c. Contiguity
- d. Contingencies

- a. E L Thorndike
- b. I P Pavlov
- c. C L Hull
- d. B F Skinner

 A B C D

- a. 3 1 2 4
- b. 1 3 2 4
- c. 3 1 4 2
- d. 1 3 4 2

3. Match List-I with List-II and select the correct answer:

List-I (Definition)

- a. Forgetting of involved events prior to the trauma
- b. Abnormality due to presence of neurofibrillary tangles in the brain
- c. Severe memory loss over the age of 65
- d. Forgetting of involved events subsequent to the trauma

List-II (Types of forgetting)

- a. Anterograde amnesia
- b. Senile dementia
- c. Alzheimer's disease
- d. Retrograde amnesia

A B C D

- a. 4 3 1 2
- b. 4 3 2 1
- c. 3 4 2 1
- d. 3 4 1 2

4. Which of the following are the components of the Atkinson-Shiffrin model?

- a. Short term storage
- b. Address register
- c. Long term storage
- d. Sensory register

Select the correct answer using the codes given below:

- a. 2 and 3
- b. 1, 2 and 4
- c. 1, 3 and 4

- d. 1, 2, 3 and 4
5. Interference theory of forgetting proposes two processes through which interference produces a detrimental effect on memory. These processes are
- Unlearning and response similarity
 - Response chaining and response competition
 - Response similarity and response chaining
 - Response competition and unlearning
6. Which one of the following was propounded by Waugh and Norman as a model of short term memory?
- Single process model
 - Dual process model
 - Simultaneous processing model
 - Multifactor method
7. Consider the following statements: Episodic memories
- are experienced as having occurred at a unique time
 - are remembered as series of events
 - are remembered as a highly veridical record of the episode, although this may not be so
 - require no conscious effort to retrieve and appear involuntarily which of the above statements are correct?
- 1 and 4
 - 1, 2 and 3
 - 2, 3 and 4
 - 1, 2, 3 and 4
8. Which one of the following is the correct sequence involved in the memory process?
- Retrieval, recognition, learning and retention
 - Learning, retention, recognition and retrieval
 - Learning, retention, retrieval and recognition

- d. Recognition, learning, retention and retrieval
9. In the short-term memory experiment of Peterson and Peterson, recall is a
- Linearly increasing function of time interval
 - Linearly decreasing function of time interval
 - Positively accelerating function of time interval
 - Negatively accelerating function of time interval
10. Who among the following is known for his work on reconstruction memory?
- F C Bartlett
 - A Pavio
 - H Ebbinghaus
 - B J Underwood
11. Which one of the following provides correct description of the term 'flashbulb memories'?
- Vivid memory of what happens to us all of a sudden
 - Memories of what we are doing at the time of an emotion-provoking event
 - Remembering a thing of past experiences by certain current revelation
 - Memory occurring in the most tranquil moments of life at once
12. Generally, institutionalized children show a slower rate of language development compared to those growing up in normal home conditions. This is most likely because the institutionalized children have
- Somewhat lower IQ scores than normal children scores
 - Relative deprivation of social reinforcement
 - Low level of cognitive development often limited to the concrete preoperational stage
 - Abstracting the rules of language
13. Consider the following statements about Noam Chomsky:
- He called himself a Cartesian linguist.
 - He analyzed syntax.

- c. He wrote about transformational grammar.
- d. He developed an artificial language called Yerkish.

Which of the above statements are correct?

- a. 1 and 2
 - b. 1 and 4
 - c. 1, 2 and 3
 - d. 2, 3 and 4
14. Prosodic cues such as stress, pitch, pause and intonation play an important role in language perception. These are called
- a. Social factors
 - b. Semantic factors
 - c. Metalinguistic factors
 - d. Suprasegmental factors
15. Match List-I (Component of language) with List-II (Nature of linguistic cues) and select the correct answer:

List-I

List-II

- a. Phonological
- b. Semantic
- c. Syntactic
- d. Pragmatic

- a. Sound
- b. Contextual
- c. Structural
- d. Meaning

A B C D

a. 3 4 1 2

b. 1 2 3 4

c. 3 2 1 4

d. 1 4 3 2
