

Exams: Pharmacy Subjective Questions

1. Antonym of solituous ... (uncaring).
2. Betain structure consists of...
3. R &S configurations are ...
4. 1, 4-dioxane NMR peaks... (1peak).
5. Methyl chloride cause ... shielding or desheilding?
6. PH of 0.005 N HCL ...
7. Terfinadine toxic effect & adverse effect...
8. Why levodopa is essentialin parkinsonism treatment ... (can cross BBB).
9. Fater of chemothearapy ... (Paul ehrlich).
10. In which form solubility of cyclodextrin is maximum ... (beta form).
11. Acid chloride frequency ... (1680 cm-1).
12. Tomoxifen acts by ... (estrogen receptor blocking)
13. Lactum obsorbs at what frequency ...
14. IR-calibrath is ... (polystyryn film).
15. Hydrogen bonding is detected by ... NMR, IR
16. Product yield calculation ...
17. Morphin acts on which receptors ... (and on which opioid)
18. Cardiac cal. Channel receptors are ... voltage gated
19. Receptors are made up of ...
20. Pirenzipine antagonist of ...
21. Bredt's rule...
22. Doxorubicine toxic effect ... cardio toxicity
23. Sparingly soluble ...
24. Wich vitamine shows teratogenicity ...

25. IR ranges ...
26. Comparison of energies of UV, IR etc...
27. Enthalpy is ...
28. Exothermic and Endothermic rxns
29. Terms related to thermodynamics ... Rate
30. Enalaprilat is ...
31. Cough is side effect of ...
32. Phase-4 clinical trails
33. IPEA is related to ...
34. NDA &INDA is ...
35. IN HPLC which phase is most widely used ...
36. Indian ginseng is ...
37. Geographical source of saffron ...
38. THE country which is first in the production of cotton ...
39. Phytochemical drug used as cardioprotective in Europe...
40. Airport s used for trade...
41. NMR range measured in ... Ppm
42. In size exclusion is used for ... Polymers
43. SDS phase is used for ... proteins n peptides
44. Circular dichroism is used for ...
45. Metalic species can be determined by ...
46. B2 selective agonist ... butoxamine
47. Asprin acts by ... cox inhibition
48. Prostagladins synthesis inhibited by ... COX inhibitors
49. Seretonin is ...
50. Central dogma of life ... DNA to mRNA to Protien
51. Glutathione is ... Antioxidant
52. 2-CO-NH2 means ... tripeptide

53. Ophthalmic preparations differs from parenterals ... pyrogen free
54. Osmotic pressure of plasma ...
55. Micro organisms not grow in ... Salt solution, ice, water, blood
56. Bacteria cell wall consists of ... polysaccharides
57. Nicotin receptor is ...
58. Myastania gravis cause ...
59. Which of the following is a degenerative disorder ... Alzheimir's
60. Which plastic polymer have max. Vapour permeability ...
61. Rifampicin is also used for ...
62. Microadhesive polymer ...
63. Buccal drug time ...
64. Effect of muscarinic agonist on GIT ...
65. PH of gelatin in capsule ...
66. Which gelatin comes from green bone ... Type-b
67. Vasodilator is ...
68. Which of the following drug shows extensive first pass metabolism ... Propranolol
69. Cancer therapy cause ... Emesis
70. Metoclopramide MOA ...
71. Dopamine acting on which receptors ...
72. Alkaloid used in cough syrup ...
73. Sugar syrup contains ... And its use
74. Parts of antibody structure ...
75. Characters of t-RNA ...
76. Insulin secreted by ...
77. Secondary messenger is ...
78. Following drug is approved by FDA for hair growth ... Minoxidil
79. Salmeterol & Albuterol MOA ...
80. Nifedipine structure ...

81. Aids is due to ...
82. α_1 -antagonist ...
83. ABC system is used for (from administration) ... inventor system
84. Polymorphism shown by ...
85. Polymer used to decrease ... Tg
86. Thermal stability is checked by which thermometer ...
87. Sugar addition in protein leads to form ...
88. Non reducing sugar ...
89. Threose and erythrose are ...
90. Anomer, diastereomers ...
91. Double bonds are detected by ...
92. Welfare state means ...
93. $A + B = 100$ and $A - B = 26$ then the large no. is ...
94. LOGICAL WORD ...
95. Drug with PH of 5.6 will be absorbed in ...
96. Microvilli function in intestine ...
97. Ion channels are ...
98. Dioxane NMR peak ...
99. Nifedipine is a ...
100. BBB ...
101. Neostigmine does not pass BBB ...
102. Which is not an enzyme inducer ...
103. Coumarin basic structure ...
104. Endogenous anti coagulant ...
105. Omeprazole MOA ...
106. Which one is protogenic solvent ...
107. Standard substances for NMR ... TMS
108. In IP, RS means ... Reference standard

109. In which case back titration used ...
110. Paracetamol metabolite responsible for hepatotoxicity is ...
111. Phenolphthalein is which indicator ...
112. Carbene in presence of OH⁻, CCl₃ follows which mechanism ... Ecb
113. Which culture is difficult to fermentation ... Submerged
114. Organell other than nucleus containing DNA ... Mitochondria
115. Which is not a static dryer ...
116. Cytokinin is ...
117. Triterpenoid contains how many isoprenoid units ...
118. Phenytoin is used in which type of arrhythmia ...
119. Arbonic anhydrase inhibitor ... Acetazolamide
120. Difference b/w triampterin and aldosterone ...
121. In asthma which drug is contra indicated ... beta blocker
122. Colchicin used in ...
123. PEG is ester of ...
124. Glycerides are which type of acetals ... hemiacetals
125. Which is optically active ...
126. Regulation of gene expression occurs at what step ...
127. Nujol is mixture of ...
128. Solvent used in soft capsules ...
129. Benzyl alcoholis used as preservative at concentration of ... 1%
130. Solvent used in parenteral preparations ...
131. Which packing material of tablets is impermeable to moisture ...
132. Accelerated stability testing conditions are ...
133. Which dissolution apparatus is used for tablets ...
134. Serin protease inhibitor is ... Plasmin
135. Binder for non aqueous solutions ...
136. Isoprenyl group formed in which pathway ...

137. Auxochrome means and examples ...
138. Pharmacophore ...
139. Gallic acid is used in ...
140. Buccal delivery systems ...
141. Fluidized energy mill reduces the particle size up to ...
142. W/O emulsion HLB value ...
143. Functioning of receptor, binding, selectivity, sensitivity...
