- Apocyanaceae (Ugban family) – Rauwolfia.
- Euphorbiaceae – Euphorbia, Jatropha, Phyllanthus.
- Papaveraceae – Papaver, Argemone.
- Papaveraceae – Capparis, Cleome, Polanisia.
- Umbelliferae – Apiaceae – Coriandum.
- Rosaceae – rose – Pyrus, Spirecs.
- X \uparrow & V \downarrow - rose – pyrus, spires.
- Cosmic X UV visible IR micro Radio TV.
- Marsh spot disease.
- Intervenal chlorosis – Fe, Mn.
- Mottled chlorosis – Mo.
- (redamation) lead tip necrosis – Cu.
- Bronze lead – Cl

- Neuritic vitamin – B₁ + B₆ + B₁₂ + folic acid
- Melanin wool – capra – hircus.
- CAM plant – Scotoactive stomata.
- C₄ cycle – 1st CO₂ acceptor – PEP

2nd CO₂ acceptor – RuBP

- RQ = 0 night
- RQ > 1 day.
- E DNA – 7.5 base pair in 1 pitch.
- B DNA $\xrightarrow{\text{RH-75\% Na}^+}$ A DNA

K³, CS

- B DNA $\xrightarrow{\text{RH 66\% Li}}$ CDNA
- Ampulla → crista → cupula (balancing)
- Utricule/Sacculae → Maculae → otolith (CaCO₃).
- Hearing – Cochlea.
- Balancing – semicircular canals.
- Caeroloplasmin – eng oxidase activity – may transport Cu in plasma.
- Tilli ulniforia – inflorescence adhere to bract.
- Helwingia – inflorescence adhere foliage.
- Pappus – Compositae.
- Coma – calotropis, Holarrhena, Alstonia, Assclepiadeceae, Apocyananeae.
- Hairy outgrowth – cotton seeds.
- Persistent hair style – clematis, Xlarvelia, Anemone.
- Balloon – Physalia, Colutea arborescence (leguminosae), Cardiospermum heli cacber.
- Censer mech – capsule shaken by strong wind – poppy arisolochia giges, aconitum sunflower.
- Rolling – break at base & rolls dispersing – salsola kali tenuifolia, Amearanthus, alba, chenopodium album – tumble weeds.
- Water – Areca catecher, Mipa fructinams, pandanus, cerbera odollam.

- Hooks – Xanthium, Urena Lobate, Martynia diandra, pupulia.
- Stiff hairs – Andropogon aciculatus, aristida.
- Cracking sound – Entada gigus, bauhinia vahliu.
- Cracking sound when touch – Inpateiens balsamina (balsam)
- Jaculator mech – Rubellia tuberosa, Andrographis, Barleria priontis.
- Squirting cucumber – Ecballium elaterium.
