Glide to success with Doorsteptutor material for UGC : Get [detailed illustrated notes covering entire syllabus](#): point-by-point for high retention.

- C – 29 - Cabbage leaves
- C-7 - Pinus species
- Ruffines Corpuscles – hot Temperature
- Krause Corpuscles – Cold Temperature
- Edestin - Hemp
- Amandin - Almond
- Canavalin ensiformis - Jack Beans
- Solmine - salmon
- Sturine – Sturgeans.
- Glidens – Wheat
- Zein- Corn (maize)
- Excessive Serible - myomalacia
- Largest Starch grain = Banana
- Oat largest Starch Grain Compound
- Fluorine deficiency- dental caries & osteoporosis
- Fluorine excess -dental fluorosis
- Ultrasound – Pb –Ti –Zr- Piezoelectric field
- WHO Recommends industrial noise limit = 75 dB
- X-Ray diffraction – double helix configuration of DNA
- Cobra krait – neurotoxic
- Viper – Haemotoxic
- Linkage – Lathyrus odoratus
- Mutation – Oenothera Lamarckiana
- Na soap – hard

- K soap – soft
- Respiratory quotient (RQ) - It is measured using Ganong's Respirometer. If RQ is high Hg level will decrease
- Developing fatty seed fat - Carbohydrate
- Maturing fatty seed carbohydrate - fat.
- Annelida – Saliva is Hetero Tanana
- Bohr's Effect - O₂ Carrier
- Haldane Effect – Co₂ Carrier
- Chromosome to sex Determination – heterosome/ B-chromosome
- (2n_{male} + 4n_{female}) triploids – seedless watermelon
- Polyploidy – colchicine
- Dissolution of tail of tadpole – Cathepsin
- Opuntia – leaf spine
- Duranta – Stem spine
- Histone – basic Proteins
- Hertone – Acidic proteins
- Trypanosoma Cruzi – Chagas disease triatomic bugs
- Phosphoarginine – muscles of invertebrates
- Phosphoceratine – muscles of vertebrates
- Flightless Bird – Ratite
- Edbrin low + Indian Braham Bull = Bragross
- Silk secreted by pupae, obtained from cocoon
- Endospore – most resistant stage of Bacteria
- Leaf nodule – pavata
- Cistron – Functional unit
- Recon – Recombination unit
- Muton – mutation unit
- Amyloplast – starch – potato

- Elaioplast – Oleosome – Castor
- Aleuronoplast – protein – maize
- Helotism = slave master relation eg Fungus & algae in lichens.
- Sperm enter egg – reception cone
- Max transpiration – dermal tissue
- Adaxial – upper, surface, close to axis of leaf.
- Abaxial – lower, away from axis
- Foramen of panizzae – between two arteries of crocodile
- Cockroach – Corpora allata – neotenin
- Corpora cardiaca – arthrodiphenyl
- Prothoracic gland – moulting hormone
- Second heart of body – cisterna chyli
- Measure growth in leaves – space marker disc
