Competitive Exams: Cyclones

Glide to success with Doorsteptutor material for CSIR : Get [detailed illustrated notes covering entire syllabus](#): point-by-point for high retention.

Cyclones are of two types:

1. Tropical Cyclones caused by unequal heating of land and water within the hot regions.
2. Temperate Cyclones (or Depressions) caused by the meeting of warm sub-tropical air brought by the Westerlies with the cold polar air brought by the Polar Winds.
